

North American Inland Port Network

A tri-national integrated network of inland ports

A Committee of North America's SuperCorridor Coalition, Inc. (NASCO)

NAIPN acts to expand job creation and raise public awareness of inland ports' integral role in economic development and trade. NAIPN identifies and disseminates best practices by serving as a platform for member communication.

NAIPN was founded in 2003 by NASCO members to promote strategic distribution assets and encourage economic cooperation along the Corridor. The corridor roughly shadows Interstates 35, 29 and 94 in the United States and connects to the existing transportation infrastructure in Canada and Mexico.

NAIPN member inland ports are in various stages of development: conceptual, developmental and operational.

NAIPN benefits existing and prospective member inland ports through:

- Enhanced global marketing
- Increased business development
- Greater domestic and foreign investment
- Improved economic development reach
- Focused business retention plans
- Location and relocation efforts
- Targeted web, event promotion
- Unified matching, networking
- Heightened U.S., global profile
- Continental, global relationships
- NAIPN member benefits, advantages
- Branded elite SuperCorridor status

NAIPN actively seeks to expand its membership. For more information, please go to www.nascocorridor.com/naipn and/or contact Francisco Conde, NASCO Director of Special Projects, at 214.744.1018 or frank@nascocorridor.com.
